# OUTDOOR

# FUNCTIONALITY

# IN DETAIL

Outdoor  
functional ceramics

Frost resistance  
25 year guarantee\*

Mechanical  
adhesive qualities  
for a safe and per-  
manent bonding.

Ideal for renova-  
tions of balconies,  
terraces and  
outdoor stairs.

For a perfect floor  
concept.  
Stairs, steps and  
edge finishes.

Sustainable  
building material.

Energy-efficiently  
manufactured.

## IDEAL TENSILE ADHESION PROPERTIES

The marked structure of the reverse side that comes from the production process, in which wet clay is extruded to produce coarse ceramics, allows for optimal contact with the substrate and therefore the best possible tensile adhesion. (REM image at 500 x magnification – direct plan view).

On selected products:  
Frost resistance  
25 year guarantee\*

\* Ströher grants a 25-year guarantee on frost resistance for the following selected coarse ceramic products and series when laid professionally by a qualified specialist company: Roccia Next, Selected, Gravel Blend, Epos, Aera, Roccia, Terra, Stalotec, Farbklang, Nuancist, Brickwerk, Wasserbrand, Kontur, Riegel 50, Steinlinge, Glanzstücke, Zeitlos und Keravette.

### FUNCTIONALLY ENHANCED CERAMIC WITH MEMBRANE EFFECT

Thanks to the manufacturing method using extrusion, Ströher ceramics have a 'weather-proof' pore structure involving capillary channels that allow the material to 'breathe' as well as a homogeneous particulate structure that promotes drainage. Even the smallest amount of condensation can escape naturally. We call this the membrane effect.

### VARIETY OF TRIM PIECES

From the innovative balcony edge loft angle tile to the straight-lined loft stair tread tile or loft corner: These are modern, mature and proven ceramic solutions in concept. Especially for balconies and terraces.

### STRÖHER HARDGLAZE 2.0 AND 3.0

The next development in Ströher's hard glaze technology provides better anti-slip safety in wet conditions – still with the same ease of use and cleaning.

# ROCCIANEXT NEW

## The new coarse ceramic that doesn't look it.

### The clear aesthetics of the new generation.

The generic term for outdoor ceramics, with which a rich and fascinating journey of coarse ceramics' evolution began 25 years ago, is starting a new chapter – in a new generation: In a clear aesthetic, in a combination of natural stone effects and in a unique surface, a new, very personal style of modern outdoor ceramics was created. This is Roccia Next. Mineral look, in three colour variations, two formats and with matching loft moulding range.

A new coarse ceramic outdoor concept with which we are embarking on a contemporary path. With elegance and beauty and including the usual application safety and concept comfort. Because extruded ceramic shards ensure maximum outdoor durability when laid professionally.

# ROCCIANEXT NEW

**Natural. Aesthetic. Functional.**

# SELECTED

**Retro modern mix exposed concrete.  
For a highly versatile and user-friendly surface.**

**Contemporary décor ceramic tiling.**

Opposites that attract: urban style and vintage romanticism. Selected combines the minimalist elegance of exposed concrete with fine geometrical or floral elements. The result is a new type of outdoor urban style: understated, yet comfortably warm. Discreet, yet deliberately expressive.

Selected allows for individual freedom of choice using three warm colour shades and the formats 30 x 60 calibrated and 30 x 30 cm. As well as decorative elements with various, random designs and layouts. Naturally, Selected has all the attributes of Ströher paving in terms of safety and comfort of use – including solutions for ceramic steps and edges. A extruded ceramic body, with fixed laying by professionals, results in maximum toughness for outdoor use.

# SELECTED

Contemporary. Retro modern. Functional.

# GRAVEL BLEND

**Fine grained matrix.  
Coarse grained ease of cleaning.**

**Round rolled pebbles. Extruded clay.  
For the antique look with function.**

Gravel Blend's surface finish is modelled on conglomerate rock with a fine-grained matrix and river-pebble inclusions. It is a naturally occurring type of stone that has formed over the course of millions of years since the Alps began to take shape.

Gravel Blend is also created by means of a classic 'baking' process, which makes ceramics very resistant. This is known as 'extrusion' of moist raw clay. Fired using the most modern furnace technology, Gravel Blend combines the primeval appearance of 'conglomerate' with the utility of an easy-maintenance, non-slip outdoor surface. Modern, frost resistant and durable.

# GRAVEL BLEND

Trendy. Archaic. Extruded.

# EPOS

**Keeps promises.  
Extruded natural stone ceramic.**

**Natural stone in design and feel.  
As usual easy to clean, frost resistant and outdoor functional.**

Epos is the easy-to-use solution for an environmentally friendly, easy-clean and reliable stone floor effect. Distinctive natural stone ceramic – processed with care; made possible by means of state-of-the-art digital printing technology that does not produce a ‘transfer’ look that is otherwise common with digital printing.

This is where the ‘look’ and the ‘feel’ produce a special impression together. Thanks to Hardglaze 3.0, developed especially for digital printing, you have to look very hard – or feel very carefully – to detect that it isn’t really natural stone. And that is combined with the typical hard glaze extra-easy cleaning characteristics.

Outdoor functional ceramics

Frost resistance  
25 year guarantee\*

Mechanical adhesive qualities for a safe and permanent bonding.

Ideal for renovations of balconies, terraces and outdoor stairs.

For a perfect floor concept. Stairs, steps and edge finishes.

# AERA

## **Confident surface impression. Strong character expression.**

**Classic on trend floor. Easy-care stone finish.  
Coarse ceramic natural stone.**

For centuries formed under tremendous pressure: That is the history of natural stone's formation. But then a new era dawned: extruded ceramic bodies with characteristic vein inlets, mineral inclusions and natural color play.

As reduced, as cozy or as elegant as the architectural style, the color choice of this flooring determines its appearance. Cool gray, strong anthracite, warm red and distinctive beige - colors with strong character that are associated with the Bauhaus, country house or mansion style trends in contemporary residential architecture.

Aera offers the typical Ströher application reliability and the usual conceptual comfort with matching ceramic stair and finishing solutions included. Because the extruded ceramic body ensures maximum outdoor durability when installed in a professional manner.

# AERA

**Frost-resistant. Slip-proof. Confidently stylish.**

# ROCCIA

**Relief-stressed, rock-like structure.  
Ströher evergreens and classics.**

**Functional balcony surfacing as a generic term for  
'Outdoor Ceramics'.**

Every success story is driven by a certain phenomenon. By the stroke of fortune of having the right idea and putting it professionally into practice at exactly the right time – and not just once.

This classic product is the realisation of an idea that timelessly encompasses the zeitgeist. A Mediterranean surface structure combined with the product benefits of genuine coarse ceramic material. Frost resistance and trim pieces variety with a relief-stressed, rock-like structure. Summer flair that can withstand the winter; winter hardness with the flair of summer. For outside and inside.

# ROCCIA

Frost resistant. Anti-slip. Relief-stressed.

# TERRA

**Vibrant colours.  
Original and resilient.**

**Classic, unique tunnel kiln product. Coloured through, sintered through, durable and easy to clean.**

The warm earth tones and surface give the floor an unadulterated, natural look. Terra is ceramic in its original, perhaps even primeval form.

No glaze is needed to achieve this intense colouring and the striking variations in tone. This is where the distinctively intense colours come about quite naturally through the special tunnel kiln firing. And the result is coloured right through and also durable.

Outdoor functional ceramics

Frost resistance  
25 year guarantee\*

Mechanical adhesive qualities for a safe and permanent bonding.

Ideal for renovations of balconies, terraces and outdoor stairs.

For a perfect floor concept. Stairs, steps and edge finishes.

Sustainable building material.

Energy-efficiently manufactured.

**CAVAR**

**Mediterranean airiness.  
Unpretentious but strong in character.**

**Holiday atmosphere – 365 days a year.  
Application reliability for the balcony or terrace.**

Vivacious in color and yet soothing in its appearance. A special glaze print creates a depth effect on the body, giving the otherwise rather Mediterranean pastel surface also a touch of southern wildness.

The special angle tile and the extruded body ensure that “Cavar” is perfectly suitable for outdoor use. Sophisticated in its Mediterranean appeal - but reliable in its application.

# CAVAR

Extruded. Mediterranean. Expressive.

# APPLICATION INFORMATION FOR OUTSIDE FLOORING AND OUTSIDE STAIRS

Ceramic coverings in outdoor areas must be executed professionally in accordance with the following codes of practice and standards:

- ZDB bulletin “Exterior coverings: Covering constructions with tiles and slabs outside buildings“, August 2019 edition
- DIN 18531 Waterproofing of roofs as well as balconies, loggias and arcades
- DIN 18195 Waterproofing of structures

The recommendation listed here is exemplary and serves only as a simplified, schematic visualisation. Complaints resulting from improper installation cannot be settled by the manufacturer.

Stairs outdoors and flooring edge finishes with angles, florentines or loft stair tread tiles are further to be used as follows:

To ensure safe stair construction, the riser leg lead is to be positioned behind the stair tread or angle with a gap of 3–4 mm and they are not to be grouted together. Outdoors, the application and grouting of both the stair tread in connection to the riser leg leads to damage for constructional reasons.
